Dear Co-Chair Anderson, Co-Chair Hansen, and members of the committee:

On behalf of Minnesota Farmers Union (MFU), I write to share our support for Rep. Nelson's bill (HF1795) to ensure that early care facilities can benefit from our nation leading farm-to-school program. This program is a win-win-win for farmers, families, and the state providing a reliable market for farmers while ensuring that the youngest Minnesotans have access to healthy, local, food.

MFU is a grassroots organization that has represented Minnesota's family farmers, ranchers and rural communities since 1918. Our members are excited about our state's work to build out farm to school and early care programming because these initiatives stand to improve local markets for the food they work hard to produce. These programs can also help small, beginning, and growing farmers earn a more fair price and access institutional markets. That's why our members were quick to policy in strong support of this work during our grassroots policy development process.

Much like schools, early care centers face barriers in changing their food service to include locally grown food. Support from the state can help these important community institutions make this change. Serving local farm products in early care settings can also help children and their families learn more about agriculture. Additionally, we are glad to the committee is dedicating time to this issue given the significant federal cuts to anticipated support for this important work.

We thank this committee for your past and future support for our state's leading farm to school and early care programming. If you have any questions, please contact our Government Relations Director, Stu Lourey, at stu@mfu.org or (320) 232-2047 (C). Thank you for considering the needs and perspectives of Minnesota's farm families.

Sincerely,
