

H.F. 1048

As Introduced

Subject Charter School General Education Revenue; Technical Clarification

Authors Youakim and Clardy

Date February 26, 2025

Summary

A charter school receives most categories of general education revenue in a similar manner as a school district, although some categories of a charter school's general education revenue are based on the statewide school district average revenue per adjusted pupil unit.

H.F. 1048 makes a clarifying change to ensure that these statewide general education amounts are calculated on an adjusted pupil unit basis (adjusted pupil units are essentially the served count of pupils at each school weighted by the grade level weighting). There is no cost or savings to this change as it is solely a clarifying change.
