Key Notes:

- Produce funds have been spent more slowly this year, compared to the past two years. This is due to a lack of supply from farmers with the rainy growing season, less incentive for farmers to donate produce as reimbursement rates haven't kept up with their costs, and the decision not to source from one of our larger growers amidst a civil lawsuit.
- No protein funds were spent during Q1-Q2 as we wait for sufficient Minnesota-produced pork tenderloin to become available. Pork tenderloin is typically bought with these funds because its lower price allows us to extend the reach of these limited funds. We have received our first load of protein with these funds in January 2025.
- At this point in the year, both Second Harvest Heartland and Channel One Food Banks have spent their entire portion of the F2F milk funds.

Key Notes:

- F2F funds are tracked based on when product is received from growers and producers. However, distributions by county are tracked when the product is physically sent out to the community. When product is received in one quarter and distributed out during the next quarter, it results in a discrepancy in this report. This is seen in the fact that we didn't purchase any protein this quarter, but still distributed protein received at the end of the previous quarter.
- Approximately 13,515 gallons of milk were purchased to distribute to the community with the grant funds spent this quarter.
- This quarter 577 agencies were served across 86 Minnesota counties.
