Date March 14, 2025

Summary

The laws governing public data requests generally are at section 13.03, subdivision 3. This bill creates a new subdivision 3a with two unique provisions related to public data requests made specifically to school districts. There are two main provisions.

First, it provides that data may not be requested from a school district anonymously.

Second, it allows districts to charge a data requester for the employee time spent redacting not-public data if the requester fails to appear to inspect their requested data.
