

Subject Higher education: employment outcomes reporting

Authors Knudsen

Analyst Nathan Hopkins

Date March 31, 2025

Summary

This bill would add a new additional requirement for postsecondary institutions to be eligible for state financial aid programs, like the state grant program. The new requirement would be for institutions to prominently display on their websites information about post-graduation employment and earnings outcomes for students' specific fields of study.

Also, institutions are required to annually report this information to the Office of Higher Education (OHE), and OHE is required to randomly audit institutions for compliance and to report instances of noncompliance to the legislature.
